STORY HOUR FIRST WEDNESDAY of the Month

10:30 - 11:15

Toddlers and preschoolers: Join us for a fun-filled morning of stories, activities, crafts. Children will learn important social interaction skills while they enjoy making new friends.

Bowerston Library Book Club's

Bowerston Book Review
The book club meets
2nd Thursday of the month at
10:30a.m.

Placing Holds online: Hot to get the items you want
www.bowerstonlibrary.org

1. Click on "Card Catalog"
2. Now you can search for the item that you would like
3. You can search by:
TITLE BROWSE
AUTHOR BROWSE
SUBJECT BROWSE
4. When you find the item that you would like, click on the title
5. You should see a page with item information. There are two buttons on this page" Add to my list" and "Request any copy"
6. Click on "Request any copy"
7. On the back of your Library Card is your Borrower Barcode Number
8. Then enter your pin number

The First Day of Spring:

How Much Do You Know About the First Day of Spring?

Philip and Karen Smith/Iconica/Getty Images

The first day of spring is also called the vernal equinox. “Vernal” and “equinox” are Latin terms meaning “spring” and “equal night” respectively.

Is the Vernal Equinox Really Equal?

The idea is that on the first day of spring there are exactly 12 hours of daylight and 12 hours of darkness, but it rarely works out that way.

There *is* always a time each spring, and again each fall, when the hours of light and darkness are equal, but it usually occurs *before* the vernal equinox and *after* the autumnal equinox.

cut a bit of belly fat each day by never eating these 4 foods.

First Day of Spring--Above and Below the Equator

The vernal equinox, which occurs on March 20 or 21 each year and signals the start of spring in the Northern Hemisphere, is also the autumnal equinox—the first day of autumn—in the Southern Hemisphere. Conversely, the autumnal equinox in the north, which occurs in late September, is the first day of spring south of the equator.

Fun Facts About the First Day of Spring

Here are a few other interesting facts about the first day of spring:

If you were standing on the equator during either the vernal or autumnal equinox, you would see the sun pass directly overhead, the only two times in the year when that is true.

The two equinoxes are also the only times during the year when the sun rises due east and sets due west.

In spring, the Earth’s axis is tilted toward the sun, increasing the number of daylight hours and bringing warmer weather that causes plants to bring forth new growth.

There is a persistent myth that at the vernal equinox, and only at the vernal equinox, can you stand a raw egg on its end. There is an equally persistent rebuttal that says it’s not possible at any time to balance a raw egg on its end. Neither assertion is true. With a little patience (or sometimes a lot), you can balance a raw egg on its end at any time of year. The first day of spring has nothing to do with it. possible at any time to balance a raw egg on its end. Neither assertion is true. With a little patience (or sometimes a lot), you can balance a raw egg on its end at any time of year. The first day of spring has nothing to do with it.
